For many years, Franzis has been the go-to software for people looking to create interactive presentations. It's an intuitive design tool that's often used in business environments for everything from webinars and online training courses to team meetings. With FOCUS 4, Franzis has taken its previous suite of offerings and made it even better. The result is a powerful presentation environment that features advanced tools like timeline animations, character interactions, and narration recording. Franzis FOCUS Projects Professional 4 is one of the most comprehensive presentation products on the market today. It has three different versions: FOCUS Projects, FOCUS Projects Professional (standard), and FOCUS Projects Professional (advanced). The standard version comes with 13 template styles and 1,400 design elements to choose from. The advanced version has everything the standard version has, as well as support for 3D animations, audio and video recording, and other advanced features. While Franzis FOCUS Projects is aimed at the enterprise, the company also offers a free trial that users can download to see what it's all about. The first thing you'll notice about Franzis FOCUS 4 is its intuitive interface. It has everything you need to create a professional presentation in one place, from a basic skeleton to all the parts of an interactive, animated presentation. It's possible to make a presentation in minutes by dragging and dropping elements from Franzis' library of designs. You can also add your own images and other files, which gives you a huge amount of flexibility. And since everything is accessible from the ribbon bar, it helps users get their presentations up and running at lightning speed. In addition to being easy to use, Franzis FOCUS 4 is also very robust. With its integrated screening tools, you can give clients or supervisors a look at your progress before launching it live. It also comes with a wide variety of templates that you can choose from, ranging from whiteboard-style presentations to more traditional PowerPoint presentations. There are also several different options for customizing your slides, including the ability to add animations and transitions. Franzis FOCUS 4 has all the basic tools you need to create an interactive presentation. This includes things like character-based interactions, sound effects, and voiceovers. It also has some advanced features like 3D animations (which can be used to create characters) and timeline animations (which are used to animate certain elements). The software is compatible with all major browsers, which makes sharing files easy. There are also three different workflows you can choose from, which are described in detail in the Franzis FOCUS Projects Professional 4 user manual.

Franzis FOCUS Projects Professional 4 Screenshot The Franzis FOCUS Projects Professional 4 Crack release notes provide the following details: Features:
